

# CSE523: Machine Learning

Faculty Mentors: Prof. Mehul Raval

## Weekly Project Report

### Stock Price Predictor

Team MUSK

#### Student's Details

Student's Name	Enrollment Number
Sanskruti Shingala	AU1940124
Mansi Savaj	AU1940158
Krinal Boghani	AU1940195
Udit Kapadia	AU1940214

- **Tasks Performed in the week**

- started doing coding of our two approaches moving average and linear regression
- modified presentation ppt
- Researched more techniques to be used for stock price prediction

- **Outcomes of the tasks performed.**

- We got some of the output we want from the coding part
- Had some ideas from case studies that which approach/algorithm will work with more accuracy
- Learned about more ML algorithms that may be used for price prediction.

- **Tasks to be performed in the upcoming week.**

- Have to study more about the sudden changes in prices and their factors
- To focus on the coding part
